Among the inspirational achievements of the nineteenth century, none stands out more clearly in its actual worth to human progress than that of Samuel Colt, who as a boy, in 1830, originated and made practical the idea of six pistols in one - the Colt Revolver. But more than all, the Colt has stood throughout the years an emblem of protected right - an advocate of Law and Order.

The first Colt revolvers were made at Paterson, N.J., Arms Company and, two years later, the so-called “Texas Pistol” was put on the market. From that time until the present day Colts have rendered valiant service in every American military engagement beginning with the Seminole uprising and throughout the World War.

However, it has been during times of peace that Colts have meant most to the progress of America. Colts in the hands of intrepid and determined pioneers policed the far western plains and mountains when the Mississippi river was virtually the Western frontier of our nation. Colts brought law and order to a vast empire which had been overrun with renegades and rogues, helping to make famous such inspiring names as Kit Carson, Fremont, Buffalo Bill, Pawnee Bill, Wild Bill Hickok, Pat Garrett, and Custer.

Colt Unvarying Quality
The Colt Company has always manufactured one grade only of firearms and that of the highest possible quality in design, material and workmanship. Exactly the same quality of manufacture that is furnished to the United States Government for Marine, Navy and Army Service, to police departments and protective agencies the world over is furnished to every user of Colt Revolvers and Automatic Pistols. This is because every arm turned out by the Colt organization is made on the same machines by the same workmen, of the same material and must pass the same forms of inspection and test: Colt firearms are designed by men schooled in the arts and traditions of building firearms for a century, and many of the craftsmen doing and inspecting the particular work of Colt manufacture and assembly have been in the Colt organization for fifty years or more.

How Colt Fire Arms are Made
Every bar of steel used in Colt Fire Arms manufacture is compounded and rolled at the Steel Mills in accord with Colt specifications. Materials are not only carefully selected but are subjected to the most scientific analyses and tests by trained engineers and heat treated by expert metal hardeners. Parts are micrometer gauged for absolute accuracy, finishing operations carefully checked and assembly of arms accomplished by expert workmen. Finally, each arm is adjusted, proof tested, and shot or targeted by experienced marksmen to determine accuracy and exactness of operation, before it is put through the final inspection and is entitled to have stamped upon it the little triangular “Verified Proof” mark.

Colt Standard of Inspection
The finishes given to Colt Revolvers and Automatic Pistols result from years of experiment and experience to produce the best possible plating and blueing methods. The character of service demanded of Fire Arms calls, not alone for unusual skill in application of finishes but the best methods and equipment, to insure maximum permanence of finish.

This description of Colt Fire Arms manufacture is certain to create a vivid impression of the thoroughness that characterizes every act performed in the Colt factory. It is only through this unflagging attention to even the minutest details that Colt’s has attained and retained its leadership in the Fire Arms industry since 1836.
On The Cover:
Forging is the first step in creating the Colt semi-automatic pistol. This 1911 Model O1070A1CS shows the exquisite detail of the finished product against a contrast of the forged steel blank from which all Colt 1911 style pistols originate.

Iconic Colt Dome
Hartford, Connecticut
A gilded ball sits atop the Colt dome, above which is a gilded replica of the original “Rampant Colt.”
CONSISTENCY

From the very first step, the journey from forged blank to finished firearm begins with consistency. The first grind operation sets the standard from which all Colt semi-automatic pistols are manufactured. Grinding the forging to a consistent thickness is step one in the process in Colt’s 1911 style pistols.

Janusz Kolakowski
Grinder Operator
Since 2007
The Colt 1991 Series is a direct descendant of the original Colt M1911. A long trigger, flat mainspring housing and original style recoil spring system remain from the original M1911 design. Upgrades from the original include white dot sights and a lowered ejection port for extra reliability. It still remains “the standard” that everyone tries to imitate, but no one duplicates.

Some manufacturing processes simply cannot be improved upon. Shaving the receiver to accept the trigger shoe on these vintage machines has proven to be the most consistent and precise method since 1911. The building of a Colt 1911 involves numerous and varied processes, combining traditional technology with the new.

George Torres
Machine Operator
Since 2007
COLT XSE™ SERIES

GOVERNMENT® MODEL
COMMANDER® MODEL

The Colt XSE Series features everything that top shooters demand in a pistol. The foundation for these pistols is a forged receiver, a forged steel slide, a forged stainless steel barrel and a forged steel slide stop. Front and rear slide serrations come standard along with Novak® sights. The Colt Upswept Beavertail Grip Safety with Palm Swell and enhanced cut under the trigger guard allow for a secure hold on the pistol. The Colt Tactical Ambidextrous Safety Lock allows for either right or left handed operation. The addition of a one piece, full length guide rod rounds out a pistol suited perfectly for the shooting enthusiast or the personal defense user alike.

Along with traditional methods of production, Colt employs sophisticated machining processes in the manufacturing of its renowned firearms. The Computer Numerical Controlled (CNC) machining of receivers brings a superior level of precision to each manufactured handgun. This technology ensures every Colt part is interchangeable, and offers the superior level of consistency for which the Colt brand is known.

Joao Amaral
CNC Operator
Since 2007
Once again, Colt returns to its roots. Where quality and workmanship are demanded, Colt continues to exceed its customer’s expectations. This classic pistol, the Colt Combat Elite, is built with exciting features desired by the combat-style match shooter, along with the quality and reliability they demand. A great addition for any collector or avid shooter, features include half checkered and half smooth rosewood grips embossed with the Colt logo, a Colt Upswept Beavertail Grip Safety with Palm Swell, a Colt Single Side Tactical Safety Lock, a National Match® Barrel, Novak® sights and other standard features of the XSE Series. The heart and soul of the Combat Elite pistol is still derived from its forged steel receiver, forged steel slide, forged stainless steel barrel and forged steel slide stop.

Available Models

CNC technology with pinpoint precision.
DEDICATION

Each Colt is test fired for function and accuracy. This critical step insures the customer gets the Colt firearm they expect. With this dedication to excellence, each Colt must earn its proof stamp of approval.

Jerry Deveau
Rangemaster
Since 1985
COLT RAIL GUN®

History Meets Modern Era:
THE COLT RAIL GUN®

Colt continues to take its battle and time proven M1911 pistol and adapt it to meet the changing requirements of its customers with its model O1980RG — The Colt Rail Gun with Blackened Finish. Where quality and workmanship are demanded, Colt once again meets and exceeds the expectations of its customers. This handgun is outfitted with new and exciting features for the law enforcement community, the shooting enthusiast and the personal defense user. The Accessory Rail offers the versatility to attach tactical lights or laser sights to the receiver of the Colt Rail Gun, making it a tactical pistol easily adaptable to any military or law enforcement need. This ability to attach a tactical light also makes the Colt Rail Gun an ideal candidate for a home/personal protection need. The Colt Rail Gun features an Accessory Rail, Colt Upswept Beavertail Grip Safety with Palm Swell, Colt Tactical Ambidextrous Safety Lock, Novak® sights, and other standard features of the XSE series. Colt’s quality continues to be derived from its forged steel receiver, forged steel slide, forged stainless steel barrel, and forged steel slide stop.

Available Models

Every Colt firearm earns its proof stamp.
Precise tolerances are critical in the manufacturing of semi-automatic pistols. CNC machining of the slide insures an exact fit and precise function for each and every handgun. The human element brings an added measure of precision, with consistent measuring of the critical machined features.

Kedar Khatiwada  
CNC Operator  
Since 2008
The Colt Gold Cup is known as the finest shooting semi-automatic in the world, and is the standard for competitive guns. The first Colt Gold Cup pistol was introduced in the late 1950’s to give competitive shooters a gun to take directly from the dealer’s showcase to the firing line. Colt Gold Cup pistols have been used to compete in local club matches through the National Matches at Camp Perry. It features an Adjustable Wide Trigger, National Match® Barrel, Adjustable Target Sights, and many other refinements as standard.

Available Models

- Blued Carbon Steel Receiver & Slide
- 5” Barrel Length
- .45 ACP, 7 Round & 8 Round Magazine Capacity

Exact tolerances.
Colt semi-automatic handguns benefit from the process of modern technology and old world machining. Gauging the round top of the slide is a process that requires traditional machining techniques with a hands-on method that guarantees a consistent product.

Samuel Kosian
Machine Operator
Since 2005
The legacy of the Colt Government Model® is well known. From the battlefields of Normandy, to the jungles of Vietnam, this combat proven firearm has tirelessly served our Armed Forces for more than a century. This pistol features the legendary Series 70 firing system, making it a faithful reproduction to Government Models manufactured prior to World War II. This pistol also features an arched steel mainspring housing and a short steel trigger. A standard safety lock, standard grip safety and spur hammer complete this authentic throwback to Colt semi-automatics of days gone by.

Colt semi-automatic handguns are born from a combination of parts that are milled and machined to exact dimensions. In final assembly, it is the human touch that makes each and every Colt come to life. A 1911 takes many skilled machinists to manufacture, but only one loyal technician to bring it all together.

Vicky Chylinski
Assembler
Since 1972
The new Colt .380 Mustang Pocketlite is small, lightweight and boasts enhanced durability, reliability and accuracy, making it an ideal handgun for personal protection. The precise machining process, use of high quality materials and improvements in design make Colt's new .380 Mustang Pocketlite one of the most consistent and reliable firearms on the market. The aluminum alloy receiver, stainless steel slide and barrel are CNC machined from solid bar stock for precise tolerances. With a loaded magazine, this handgun weighs less than one pound. It measures 5.5 inches long and has a 2.75-inch barrel. The minimal weight and length of the gun, combined with the short single action trigger, grip design, frame design and firing pin safety block make this firearm ideal for personal protection.

**Features**

- High Profile Sights
- Commander Style Hammer
- Standard Safety Lock
- Solid Aluminum Trigger
- Lowered Ejection Port
- Stainless Cerakoted Aluminum Receiver
- Brushed Stainless Steel Slide
- 2 3/4” Barrel Length
- .380 Auto, 6 Round Magazine Capacity
The combination of man and technology is integral to Colt’s manufacturing processes. Tolerances are exacted with the Coordinate Measuring Machine, CMM. An ultra-precise, modern form of gauging, the CMM is placed in an environmentally controlled room to ensure proper results.

Andrzej Bajguz
Sr. Quality Engineer
Since 2010
The Colt M1911 pistol has been a favorite for 100 years as a service pistol, a law enforcement pistol and a personal defense firearm. Although the pistol is virtually unchanged since its adoption by the U.S. Military, Colt has continued to make the best even better. Carrying on its legacy of flawless craftsmanship, the industry leading Colt Custom Shop proudly offers the Special Combat Government Series. These models offer enthusiasts an opportunity to own a handcrafted 1911 type pistol which incorporates some of the most desired features normally associated with the best 1911 custom gunsmiths.

The Special Combat Government offers superior feel and performance for any type of user. Whether carrying it on duty, as a personal defense firearm or straight into competition, these Colts will offer reliability, accuracy and the quality for which Colt has been known for over 175 years.

Colt’s passion for special projects is legendary. When it comes to military commemoration, Colt's commitment is even more steadfast. As far back as the Colt Navy revolver and its engraved depiction of the victory of the Second Texas Navy at the Battle of Campeche, Colt has continued to inspire the men and women of our American fighting forces with limited editions like this Custom Shop Marine Pistol.

Matthew LaBonte
Custom Gunsmith II
Since 2012
More than 100 years ago, the Colt 1911 was chosen as the official sidearm for America’s Armed Forces. Today, a Colt 1911 is once again proudly serving at the side of our country’s military. After a rigorous selection process, the United States Marine Corps selected the Colt Rail Gun as their Close Quarters Battle Pistol. This marks the first time since the end of World War II that a Colt 1911 is being shipped to the United States Government.

To honor the brave men and women of this important staple of America’s military might, the Colt Marine Pistol will be made available in limited quantities through the Colt Custom Shop. What makes the Marine Colt stand out is its Desert Tan Cerakoted Stainless Steel Receiver and Slide, Novak® 3 Dot Night Sights and Flat, Serrated Mainspring Housing with Lanyard Loop. The pistol also features an Enhanced Hammer, Colt Tactical Ambidextrous Safety Lock, and a 5” National Match® Barrel.

The Colt Custom Shop performs hand fitting of critical mating parts and each firearm is test fired by the Custom Shop and supplied with the actual test target.

Marine Pistol Features

- Novak® 3 Dot Night Sights
- Enhanced Hammer
- Ambidextrous Safety Lock
- Long, Solid Aluminum Trigger
- Flat, Serrated Mainspring Housing with Lanyard Loop
- Desert Tan Cerakoted Stainless Steel Receiver and Slide
- 5” National Match® Barrel
- MIL-STD-1913 Accessory Rail

The Colt Marine Pistol comes packed in a custom designed Pelican® case including 2 seven-round magazines and a Colt branded Otis® cleaning kit.
Since its inception, the Colt Custom Shop has taken the finished Colt product to new levels of creativity. From grip modifications to intricate action configurations, a can-do attitude sets Colt apart from others in the manufacture of the coveted 1911. Custom Competition Gunsmith Rich Stoddard sets up to custom contour the front strap of a 1911.

Rich Stoddard
Custom Competition Gunsmith
Since 1974
The Colt 1911 still defines the standard for modern day semi-automatic pistols. The 1911 was the standard military sidearm from 1911 to 1985 and is still used by civilians, law enforcement and military forces today. The 1911 is the best known of John Browning designs to use the short recoil principle in its basic design. In addition to the pistol being widely copied, this operating system rose to become the pre-eminent design of the 20th century and used in nearly all modern centerfire pistols. It is popular with civilian shooters in competitive events such as IDPA, Practical Shooting Confederation, and Bullseye shooting. It is also a popular civilian personal protection firearm due to its slim profile.

The Colt Custom Shop gunsmiths that hand fit and build the sought after Special Combat Government models can also assist you in building a custom 1911 designed to your specifications and requirements. Their expertise in fitting custom parts and machining to tight tolerances allows Colt to offer the same quality and dependability normally associated with only the best 1911 gunsmiths.

Many of the engraving and decorative services performed on the Colt Single Action Army® are also available on the 1911 models.

- Smith and Alexander® or Ed Brown™ Grip Safety
- Novak® Night Sights (other options available)
- Finish in Customer’s Choice of Available Colt Finishes
- Checker Front Strap – Choice of Lines per Inch
- Tune Trigger
- Flat or Arched Checkered Mainspring Housing
- Full Beveled Magazine Well
- Hand Fit Slide to Frame
PASSION

For gun collectors and enthusiasts, there is perhaps nothing more exquisite than an engraved Colt firearm. From the very first guns ever to be turned out from the factories of Samuel Colt, embellishments by some of the most talented artists have been a hallmark of Colt. Today the tradition continues in the Colt Custom Shop with Master engravers such as George Spring who demonstrates his mastery scrollwork on a Single Action Army® cylinder.

George Spring
Master Engraver
Since 1976
Engraving Coverage

Hand cut custom engraving can enhance the beauty of a historical revolver or the sleek lines of a new semi-automatic pistol. Level “A” provides one quarter coverage, producing the effect of delicate embellishment. Full coverage, Level “D”, creates a uniquely fully engraved decorative showpiece for any collector. Level “B”, half coverage and Level “C”, three quarter coverage offer engraving that will highlight specifically chosen areas of the firearm such as the cylinder of a revolver or the slide of a pistol.

Let the Colt Custom Shop
Create your Family Heirloom
THE HISTORY

The Colt Single Action Army® revolver is undoubtedly the most famous handgun in firearm history. From its early beginnings, the Single Action Army revolver has held its place as The Gun That Won The West and today the tradition continues. The Single Action Army is still made the traditional way and passes through the hands of many accomplished machinists and technicians before meeting its final assembly by Ron Roy who brings the Peacemaker® to life.

Ron Roy
Assembler
Since 1974
Introduced in 1873, no Colt revolver has earned greater fame than the Single Action Army®, The Peacemaker®. In design and performance, in line and form, no more sculptural and practical Colt has ever been created. Movies serve as constant reminders of the role this equalizer played in winning the West.

Large numbers of knock-offs and look-alikes have never been able to replace the real Colt. Records on the SAA Revolver are a Who’s Who of action-oriented Americans of the late 19th and early 20th centuries including Buffalo Bill Cody, Theodore Roosevelt, Judge Roy Bean, Pawnee Bill Lilly, Captain Jack Crawford, Pat Garrett and General George Patton.

There is no machine that can match the skilled hands and trained eyes of the technicians who polish Colt handguns prior to final assembly. This important step is one that makes the Colt Single Action Army® revolver stand out from all the rest and brings each revolver its unique feel and finish.

Carlos Martins  
Polisher (Left)  
Since 1990

Bogdon Garcarz  
Polisher (Right)  
Since 1994
The legend of Colt continues in the New Frontier, Single Action Army® revolver. From 1888 to 1895, Colt manufactured a variation of the venerable Single Action Army with a uniquely different profile. The “Flattop Target Model” was fitted with an adjustable leaf rear sight and a blade front sight. Colt has taken this concept several steps further to bring shooters a reintroduction of a Colt classic. The New Frontier has that sleek flattop design with a rear sight that is adjustable for windage and elevation along with a target ready ramp front sight. The New Frontier is offered in .44 Special and .45 Colt in various barrel lengths. These guns are meticulously finished in Colt Royal Blue on both the barrel and cylinder, with a color case hardened frame. Finishing off the classic package are hand fitted walnut stocks with gold Colt medallions.

ARCHIVE SERVICES

ARCHIVE LETTER
Considered one of the most unique and prestigious services offered by Colt, the Archive Letter is universally recognized as an unparalleled investment in firearms collecting. The Archive Department will search through Colt’s vast archives to provide you with accurate and documented details confirming the original specifications and delivery of your particular Colt firearm. You will then receive a personal letter outlining all the fine points of your firearm, written on Archive Department’s distinctive stationery and embossed with the official seal and signature of the Colt Historian.

Whether your Colt is a treasured family heirloom or a more recent purchase, a Colt Archive Letter can provide fascinating and valuable information of historical or anecdotal importance. The collectability and value of your Colt firearm can be significantly enhanced when it is authenticated in this exceptional fashion. Colt Archive Letters can provide descriptive details about custom engraving and other special features that will ensure the value of the firearm for future generations to treasure.

HOW IT ALL STARTED
More than 175 years ago, an obscure young seaman, Calcutta bound, carved a model of what was destined to become the world’s most famous revolver from a block of wood. His name was Samuel Colt, and from the spark of his inventive genius, came the modern firearms of today. One would have to search diligently through the pages of history to find a more romantic and glamorous figure than Samuel Colt. His was the mind of a genius, a planner and a dreamer, all in one. His vision was not local, but worldwide. His ambition exceeded mere prosperity and power. Complete satisfaction could only be his when he had reached the pinnacle of his chosen field. His own deeds and the life he lived have immortalized him, and the products that still bear his name are a constant tribute to his ability and his resourcefulness. Samuel Colt’s effort to market his inventions is a record of amazing courage, ingenuity, and perseverance. That one so young in years and so handicapped by poverty and lack of prestige could prevail against such odds is one of the marvels of individual American enterprise.

Archive Letters are embossed with the official seal and signature of the Colt Historian. Please contact us or refer to our website for information regarding researchable models as well as prices.

SAFE HANDLING OF YOUR COLT FIREARM

Colt has long been committed to policies and practices that promote the responsible design, distribution and sales of firearms to qualified, law-abiding citizens who seek to purchase and use firearms for legitimate purposes in a safe and responsible manner. Those who purchase and handle firearms have a responsibility to themselves and others to use firearms safely. The Basic Firearm Safety Rules set forth below establish a foundation for gun safety. Please remember, however, that these Rules are ONLY a starting point for the safe handling of firearms within our community.

THOROUGHLY read the safety and instruction manual supplied with your firearm before handling.
ALWAYS treat every firearm as if it were loaded.
IMMEDIATELY check to make sure that the firearm is not loaded before giving it to another person.
ALWAYS check to make sure a firearm is not loaded when picking it up.
NEVER chamber a round until ready to shoot.
NEVER leave a loaded firearm unattended.
ALWAYS store unloaded firearms and ammunition in separately secured locations, so that children and untrained adults cannot gain access to them.
NEVER point a firearm at anything you do not intend to shoot regardless of whether the firearm is unloaded or on safety.
NEVER consume alcoholic beverages or mind altering drugs before or during the handling of firearms.

ALWAYS make sure that the target and the area surrounding the target are safe before shooting.
NEVER rely on the firearm’s safety mechanism and ALWAYS abide by safety rules regardless of whether the firearm is unloaded or on safety.
ALWAYS make sure the barrel of the firearm is clear of obstructions according to the safety and instruction manual.
ONLY place your finger on the trigger when you are actually aiming at a safe target and have made the decision to fire.
ALWAYS use the proper ammunition for your particular firearm.
ALWAYS refer to the operation manual if your firearm fails to fire.
NEVER alter or modify your firearm.
NEVER shoot a firearm at hard surfaces or water.
NEVER transport a loaded firearm and ONLY load a firearm at the destination where you intend to shoot.
ALWAYS properly maintain your firearm.
ONLY clean your firearm when you are absolutely sure the firearm is unloaded.
NEVER climb a tree, fence or obstacle with a loaded firearm.
ALWAYS wear appropriate ear and eye protection when shooting or observing.

If you have any safety questions concerning our products, please contact us here at Colt - 1-800-962-COLT.
